

## Canadian Operations Overview

**Agri-products** Through our retail locations, Viterra provides thousands of farmers with the inputs they require to optimize their crop investment. **Products and services** include **seed**, **fertilizer**, **crop protection products**, **equipment**, and expert agronomic advice. Our dedicated research and development focuses on new seed varieties tailored to meet the needs of destination customers and farmers.

**Grain handling & marketing** As the largest grain handler in Canada, Viterra's sourced and marketed grain is delivered to customers in more than 50 destination countries. Our industry leading elevator network across Western Canada and port facilities in Vancouver, BC, Prince Rupert, BC, and Thunder Bay, ON, have helped us achieve over 45% of the western Canadian market share.

**Processing** Viterra is involved in oat and canola processing and malt processing in Canada. As one of the world's largest industrial oat processors, we produce quality oat products for major cereal and breakfast bar brands.

With custom mills and operations throughout Canada and the U.S., Viterra provides animal feed products and nutrients to the dairy, beef, poultry, and hog industries. This provides stable, non-seasonal margins, creates end-markets for our grain, and diversifies our customer base.

Hours of Operation:

Monday-Friday 9:00 am- 5:00pm
